

Intuitive Usability, Great Scalability

A portable surface roughness tester designed
like a hand tool for easy on-site use

The SJ-220 series of portable surface roughness measuring instruments,
which has contributed to industrial development and technological progress
through precision measurements, has evolved further still.
While maintaining excellent portability and ease of use
on-site, it now also provides touch screen functionality for
intuitive operability.

Equipped with a built-in battery, it can perform
measurements even in environments where power is not
available and can be used approximately 1000 times on a full
charge.

Cableless and paperless work is also made possible by using
the Wireless Unit for Measuring Instrument U-WAVE-TIB.
This is a user-friendly device that provides compatibility and
versatility to meet the diverse needs of manufacturing sites.
